

## Dream jumping

For those that have long ceased to be sufficient normal bungee jump I have another proposal.

Jumping from skyscrapers. This discipline is only beginning to develop so it is much less places where you can try this type of stroke, not all of those skyscrapers manager agree to it so that you can jump. However, this is a remarkable proposal for lovers of strong emotions. When it becomes the roof of our 10 or more floors and there need to jump start the heart beating harder not to mention a decent dose of adrenaline at the moment which is excreted. Jumps of this type rely on the rope that is stretched between the two blocs. At the beginning of flying freely above ground and only go in the "gliding" through this precipitated the speed and reach safely to the bottom. A new way of jumping. Used for this purpose, two objects such as buildings, chimneys, bridges. There are several subgroups Dream jumping: - LONG long free, unrestricted LOT - it is estimated to be within 75-90% of the building - SHORT at first glance reminds . Security provides everything that is duplicated on two jump ropes, and the position is composed of three independent points, two devices for jumping, two strips connecting us with the instrument for jumping. All equipment has clearances FALLS. You can jump in any weather. Virtually everywhere there are any buildings or even a tree (9 m also gives a pretty good experience). Restrictions on the amount sufficiently high enough objects. Anyone can jump, a condition that sobriety of mind and freedom from disease, who do not like high blood pressure. What can curry in the air? Jumps are essential and those that carry few. There are also a special jumping or somersault with artifacts such as cycling or tobogganing. It is also important not to suffer any injuries during braking, yet want to enjoy healthy and long jumps, even the burden of the body provides a full body harness, a mild inhibition of a unique exit at the end of the flight.
